# Exit Meeting

## **Conclusion:**

USN Students Visit to Bharati Vidyapeeth (Deemed to be) University college of nursing, Pune campus with student exchange programed from 8<sup>th</sup>Jan, 2025 to 4<sup>th</sup> March, 2025 with medical surgical nursing department was very fruitful and overall it was excellent exposure for USN Student's to observe, learn and implement practices in teaching –learning and fulfilled proper nursing care in a different health care setting.

6/3/25

Dear everyone,

The weeks here have been very good, and I am happy with the program.

To the next years students, I would recommend spending a few more days in mental health and also a bit more time to the maternity ward.

It would also been great to have an extra week in the ICU.

But overall I'm very happy with the program.

- Lotte Lenes-Johansen

## FEEDBACK - OVERALL.

Firstly I want to thank you all for this learningful and amazing experience. For the SPPU, it was learningful and I would like to recommend you keep that in the program. The community health was so important and I truly enjoyed this experience. I learned a lot about the differences in India as well the differences to Norway. I think seeing different areas both the slum, different health centres, rural areas, ideal village was an important experience. I recommend keeping this posting as it is. It was good to have an AC vehicle because the heat is a little struggle for us. The maternity ward was learningful, would like to see a delivery of a baby, but that is hard to plan. Would like to see more of mental health, both see more centers and learn more about how you deal with mental health issues in India. If I could request something more was to see a surgery, maybe a day at emergency ward, but else it was good. I think overall the postings were truly learningful and I already has recommended this student exchange program to others. I think it is important to keep the 4 days of posting, since we have struggled a bit with the heat and pollutions, then we are able to stay focused the 4 days. Overall thank you all, I will miss you and remember this experience for the rest of my life. I have grown as a person.

Sincerely Emma Hjellevaer

Feedback:

Dear all:

Thank you all for such a wonderful and great learning experience. This opportunity has broadened my nursing knowledge and deeply enriched my understanding of indian healthcare practice and cultural understanding as well. I will miss you all. I really enjoyed my weeks here in india and getting to know all the amazing teachers, faculty and students.

Recommendations:

I think it was a good choice to move the public health posting to earlier as the weather gets warmer. I would enjoy multiple days of mental health posting as well as multiple days in the maternity wards.

Best regards from Hedda Mehren

## Feedbacks

Dear all

I have had an amazing experience during these 10 weeks. I am grateful for everything I have learned and experienced.

The weeks in community health were very educational. It was great to see the different urban health centers, sub-centers, villages and district hospitals. It was also interesting to experience both the slums and the ideal village. I found these weeks to be really enjoyable, and I felt comfortable. It was also wonderful to experience the culture in this way. It was also fitting that these weeks were chosen to take place early on, given that by the end, it was very hot for us.

In mental health, it was very exciting to meet the patients, talk with them, and see what it's like for them to live in such a place. All the people we met seemed happy, and it also appeared that the treatment they received was effective.

One feedback I want to say is that it will be nice if we had more days in mental health.

In the ~~maternity~~ maternity ward it was nice to see all the new mothers and the new babies.

It will be fun if we had more days here and was able to see a delivery.

I will miss you all! Thank you so much for some wonderful weeks in India.

Kind regards

Therese Faenn
