Women’s Day

A special homoeopathic health camp was organized on the occasion of Women’s Day, focusing on common health concerns among women. The camp aimed to provide free homoeopathic consultation and medicines to all female patients. The camp was conducted under the valuable guidance of I/C Principal Dr. Anita S. Patil. The venue and necessary facilities were generously provided by the Founder President of ‘Stree Shakti Foundation’, Mrs. Sandhya Tilekar, in collaboration with Pune Mahanagarpalika. A significant number of women attended the camp, presenting with various gynaecological and general health complaints. Common conditions observed included PCOD, infertility, fibroids, leucorrhoea, nutritional deficiencies, anaemia, osteoarthritis, as well as skin and hair-related problems. All patients received detailed consultation and appropriate homoeopathic medicines free of cost. The camp was successful in promoting awareness about women’s health and highlighting the effectiveness of homoeopathy in managing chronic and lifestyle-related conditions.

Guided by Dr. Anita S. Patil, with team providing homoeopathic care at Women’s Health Camp.

Team attending patients and providing consultation and homoeopathic medicines.
